PERSONAL PROJECTS

Hotel management system (05/2020 - 08/2020)

- In this project of hotel management system will be developed using the concept of java and swing framework to manage the all activity of hotel.

Institute management system (04/2021 - 07/2021)

leaf plant detection system (09/2021 - 06/2022)

- This system helps in the identification of Leaf blight and provides remedies that can be used as a defense mechanism against the blight. The database obtained from the Internet is properly segregated and the different leaf species are identified and are renamed to form a proper database then obtain a test- database which consists of various Leaf blights.
